| | Urgent | Not Urgent |
|---|---|---|
| Important | - Explicit Graph Representation of Tic Tac Toe States<br>- Tic Tac Toe Environment<br>- CPU follows optimal path on graph to decide moves. | - Visualize explicit graph.<br>- Analyze graph solution to describe a human-understandable strategy.<br>- Generalize to larger boards.<br>- Approach tic tac toe with reinforcement learning (i.e. value-based models).<br>- Store explicit graph in a binary file so that it only needs to be generated once across multiple games. |
| Not Important | - UI for tic tac toe<br>- Compiler optimizations<br>- Visualization library for visualizing the explicit graph. | - Add a menu UI.<br>- Add background music.<br>- The option to choose between player vs player and player vs CPU. |
